* SDK : Software Development Kit

PlayDapp Service Feature : MetaBlockchain

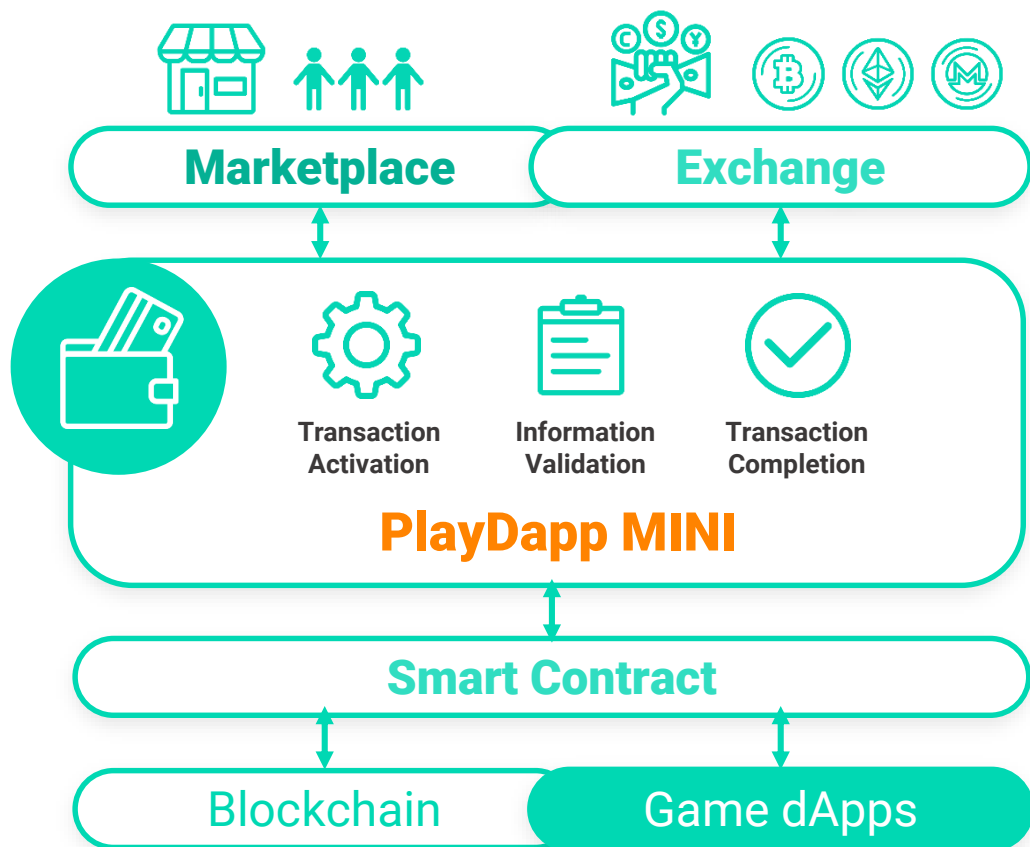

PlayDapp is MetaBlockchain, solving scalability issues according to development environment.

PlayDapp is Meta Block Chain Game Service. PlayDapp allows users & developer to easily apply block technology environment.

PlayDapp 1.0 : Marketplace & Exchange

PlayDapp 1.0 developed a trading service for launching our own NFT Marketplace

In detail of PlayDapp 1.0

PlayDapp 1.0 is an unified trading platform for users from CryptoDozer and our additional in-house developed game dApps.

- 1) To trade items/assets achieved from gameplay
- 2) To exchange fiat or other crypto currencies to PLA

>>> All the game users acquired will be gathered onto our single trading destination, allowing it to grow as a service platform to come.

For this model, 2-phase operation will be applied.

Phase 1 : Without PlayDapp MINI

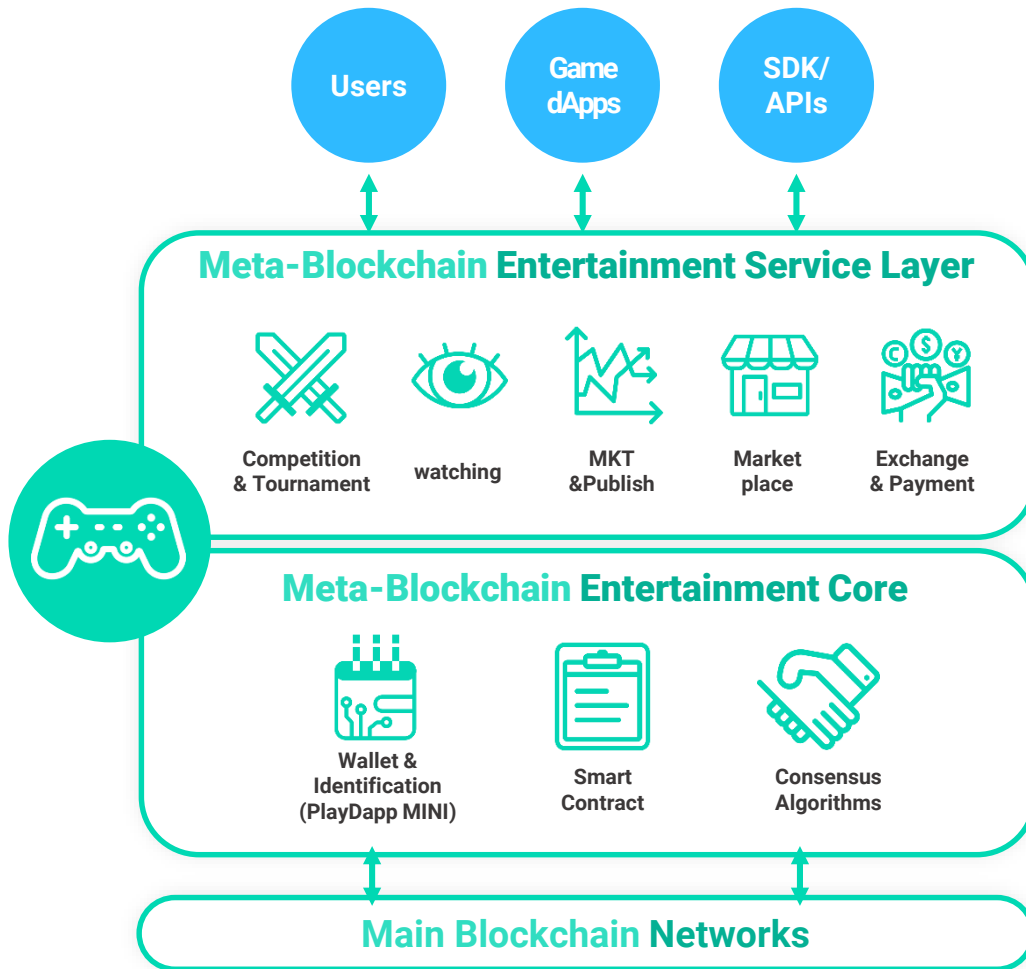

Utilizes 3rd Wallets (MetaMask, etc.) to connect + Marketplace and Exchange feature support

Phase 2 : With PlayDapp MINI support

PlayDapp 1.0 fully operated with secured meta wallet for safer transactions.

PlayDapp 2.0 : Entertainment Ecosystem

PlayDapp 2.0 completes the e-Sport development environment for PVP and Tournament.

PlayDapp 2.0 in detail

PlayDapp 2.0 is a blockchain-powered entertainment ecosystem supporting meta-blockchain which allows smooth interoperation between different blockchains.

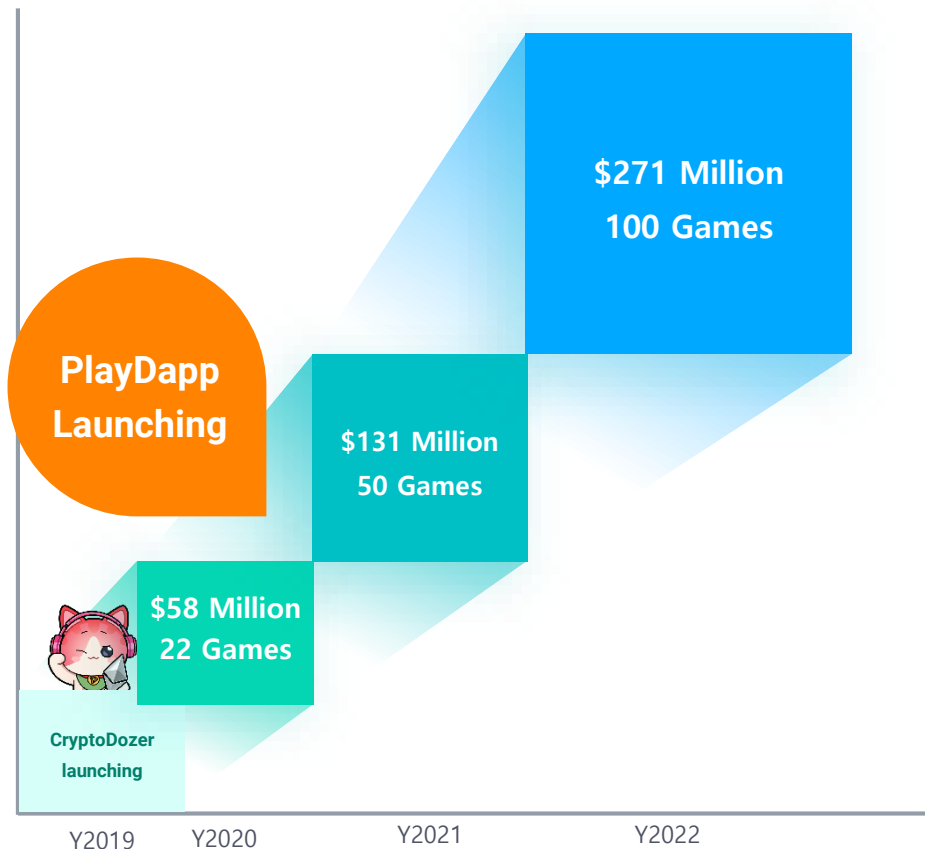

As a true decentralized entertainment service platform, it provides rich gaming experiences for users and developers

- 1) to compete and reward each other triggered by the users directly,
- 2) to watch and learn other enthusiasts' gameplay,
- 3) to trade and exchange all types of digital assets easily,
- 4) to publish a new game dApp without intermediaries,
- 5) to reach new user groups more effectively and to get insights of the current audiences.

Furthermore, any dApps or non-blockchain games could be supported and operated with simple add-ons of APIs/SDK, to enjoy all the features of PlayDapp 2.0
